Priority

If applicant desires priority under 35 U.S.C. 120 based upon a previously filed copending application, specific reference to the earlier filed application must be made in the instant application. This should appear as the first sentence of the specification following the title, preferably as a separate paragraph. The status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. _____" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Edelson [4985952] in view of Dionne et al [5645494]. Edelson discloses a mat having an upper and lower surface [fig. 1] and four equal quadrants in a rectangular configuration adjacent to each other. Edelson does not disclose a mirrored pattern in each quadrant or a body placement guide on the upper surface. Dionne et al teaches a mirrored pattern in each quadrant and a placement guide for the user. Dionne also shows the pattern includes indicia [31,32,38, 30,36] positioned longitudinally at forty-five degree

angles and comprise a line [40] extending from longitudinal axis at a forty –five degree angle. Dionne shows the design defines multiple segments of equal parallel areas transverse and longitudinal to the axis. Indicum is arranged in each quadrant and comprises intersecting lines forming ninety-degree angles. The applicant should note that a change in ornamental design having no mechanical function is an aesthetic design consideration within the skill of the art. In re Seid, 161 f.2d 229, 73 USPQ 431 (CCPA 1947).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the device of Lammersen.
